The vibrant red sandstone temples of India's Deccan Plateau, such as the Pattadakal temple cluster, have attracted visitors since the eighth century or earlier. A UNESCO World Heritage Site and the coronation place of the Chalukya dynasty, Pattadakal and its neighboring sites are of major historical importance. In Shiva's Waterfront Temples,

Subhashini Kaligotla situates these buildings in the cosmopolitan milieu of Deccan India and considers how their makers and awestruck visitors would have seen them in their day. Kaligotla reconstructs how architects and builders approached the sites, including their use of ornamentation , responsiveness to courtly values such as pleasure and play, and ingenious juxtaposition

of the first millennium's Nagara and Dravida aesthetics, a blend largely unique to Deccan plateau architecture. With over 130 color illustrations, this original book elucidates the Deccan's special place in the lexicon of medieval South Asian architecture. Jaico Publishing House In this provocative and scholarly book, Kanchari Ilaiah Shepherd propounds a view of Gautama Buddha as India's first social revolutionary. Buddha did his best to give the principles of tribal democracy and egalitarianism a sanctuary in his own sangha. In so doing, he foreshadowed modern India's experiment

with parliamentary democracy. Critical of the caste system, Buddha inducted low caste members into the sangha and made them his trusted advisers. He gave women an honoured place in the sangha. Dissent was indeed permitted, and even Buddha was not above the law. Pre-dating Socrates and Plato by some years, Buddha also foreshadowed key elements

of their philosophy. *Community and Culture* Aleph An extraordinary detailed manual on statecraft and the science of living by one of classical India's greatest minds; Kautilya; also known as Chanakya and Vishnugupta; wrote the Arthashastra not later than 150 AD though the date has not been conclusively established. Legend has it that he was either a

Brahmin from Kerala or from north India; however; it is certain that Kautilya was the man who destroyed the Nanda dynasty and installed Chandragupta Maurya as the King of Magadha. A master strategist who was well-versed in the Vedas and adept at creating intrigues and devising political stratagems; Kautilya's genius is reflected in his Arthashastra which is the most

comprehensive treatise of statecraft of classical times. The text contains fifteen books which cover numerous topics viz.; the King; a complete code of law; foreign policy; secret and occult practices and so on. The Arthashastra is written mainly in prose but also incorporates 380 shlokas. Artha; literally wealth; is one of four supreme aims prescribed by Hindu tradition. However; it has a much

wider significance and the material well-being of individuals is just a part of it. In accordance with this; Kautilya's Arthashastra maintains that the state or government of a country has a vital role to play in maintaining the material status of both the nation and its people. Therefore; a significant part of the Arthashastra has to do with the science of economics. When it deals with the

science of politics; the Arthashastra describes in detail the art of government in its widest sense—the maintenance of law and order as also of an efficient administrative machinery. Against Dharma Sage Publications Pvt. Limited Kautilya, also known as Chanakya, is India's most illustrious political economist of all time. He regarded economic activity as the driving force behind the functioning of

any political dispensation. In fact, he went to the extent of saying that revenue should take priority over the army because sustaining the army was possible out of a well-managed revenue system. Kautilya advocated limiting the taxation power of the State, having low rates of taxation, maintaining a gradual increase in taxation and most importantly devising a tax

structure that ensured compliance. He strongly encouraged foreign trade, basing it on the premise that for a successful trade contract to be established, it had to be beneficial to all. He emphasised State control and investment in land, water and mining. Kautilya was a true statesman who bridged the gap between experience and vision. For Kautilya, good governance

was paramount. He suggested built-in checks and balances in systems and procedures for the containment of malpractices. Many postulates of Kautilya's philosophy of political economy are applicable to contemporary times. Duke University Press Arthashastra literally means the text concerned with general well being on earth. Kautilya's famous treatise of this name had a two-fold aim: first to show how a ruler should protect and enhance the well being of his territory. Second, how to acquire more territory.

Publishers In Ancient India: Culture of Contradictions , one of India's most distinguished historians takes readers on an exhilarating voyage of discovery into the distant past. Upinder Singh urges us to abandon simplistic stereotypes and instead think of ancient India in terms of the coexistence of five powerful contradictions -between social inequality and promises of universal

salvation, the valorization of desire and detachment, goddess worship and misogyny, violence and non-violence, and religious debate and conflict. She does so using a vast array of sources including religious and philosophical texts, epics, poetry, plays, technical treatises, satire, biographies, and inscriptions, as well as the material and aesthetic evidence of archaeology and art from

sites across the subcontinent. Singh's scholarly but highly accessible style, clear explanation, and balanced interpretations offer an understanding of the historian's craft and unravel the many threads of what we think of as ancient Indian culture. This is not a dead or forgotten past but one invoked in different contexts even today. Further, in spite of enormous

historical changes over the centuries, the contradictions discussed here still remain. Beautifully written, deeply original, and profusely illustrated with masterpieces of ancient, medieval, and modern art, the book brings to life the rich complexity of ancient India and its connections with the present in a vivid and compelling manner. *Interrogating*

<p>Prathama Banerjee moves beyond postcolonial and decolonial critiques of European political philosophy to rethink modern conceptions of "the political" from the perspective of the global South. Drawing on Indian and Bengali practices and philosophies from the late nineteenth and early twentieth centuries, Banerjee identifies four elements of the political: the self,</p>	<p>action, the idea, and the people. She examines selfhood in light of precolonial Indic traditions of renunciation and realpolitik; action in the constitutive tension between traditional conceptions of karma and modern ideas of labor; the idea of equality as it emerges in the dialectic between spirituality and economics; and people in the friction between the</p>	<p>structure of the political party and the atmospherics of fiction and theater. Throughout, Banerjee reasserts the historical specificity of political thought and challenges modern assumptions about the universality, primacy, and self-evidence of the political. In formulating a new theory of the political, Banerjee gestures toward a globally salient political philosophy</p>
