Just when you thought you knew all there was to know about cats comes the ultimate—and unexpected—guide to taking your cat into the wild. Here are cats walking on a leash. Cats hiking on a leash. Cats tramping through snow. Cats camping. Cats kayaking, canoeing, even surfing—yes, cats who love water. When animal writer and active hiker Laura Moss couldn't find an online resource for hitting the trail with her cat, she created one. AdventureCats.org took off like

wildfire, with attention from Wired, the Huffington Post, Outside magazine, BuzzFeed, and much more. Now, the book *Adventure Cats*—a collection of jaw-dropping photographs, inspiring stories of real-life cats, and all the how-to a cat owner needs—will take readers and their cats well beyond the backyard. Learn how to leash-train a cat. What to do if you encounter wildlife on the trail. Plus, winter safety tips, and how to bring a little bit of the outdoors to an indoor cat. The stories themselves are catnip for animal lovers, from Nanakuli, the one-eyed cat who hangs ten; to Georgie, a four-year-old gray tabby who lives on a sailboat; to Quandary, who not only insists on hiking with her family but also teaches them a valuable lesson: When you follow your cat's natural tendency to wander, you experience the outdoors at a slower, richer pace. This book will delight every cat person, regardless of whether their pet is inclined to adventure. (Take the quiz at the beginning of the book to find out!)

What We Know about High School Reading Elsevier

To extract maximum performance, an engine needs an efficient, well-designed, and properly tuned exhaust system. In fact, the exhaust system's design, components, and materials have a large impact on the overall performance of the engine. Engine builders and car owners need to carefully consider the exhaust layout, select the parts, and fabricate the exhaust system that delivers the best performance for car and particular application. Master engine builder and award-winning writer Mike Mavrigian explains exhaust system principles, function, and components in clear and concise language. He then details how to design, fabricate, and fit exhaust systems to classic street cars as well as for special and racing applications. Air/exhaust-gas flow dynamics and exhaust system design are explained. Cam duration and overlap are also analyzed to determine how an engine breathes in air/fuel, as the exhaust must efficiently manage this burned mixture. Pipe bending is a science as well as art and you're shown how to effectively crush and mandrel bend exhaust pipe to fit your header/manifold and chassis combination. Header tube diameter and length is taken into account, as well as the most efficient catalytic converters and resonators for achieving your performance goals. In addition, Mavrigian covers the special exhaust system requirements for supercharged and turbocharged systems. When building a high-performance engine, you need a high-performance exhaust system that's tuned and fitted to that engine so you can realize maximum performance. This comprehensive book is your guide to achieving ultimate exhaust system performance. It shows you how to fabricate a system for custom applications and to fit the correct prefabricated system to your car. No other book on the market is solely dedicated to fabricating and fitting an exhaust system in high-performance applications.

World Mining Equipment HarperCollins

Andrew Marttila has been a professional animal photographer for the past five years and most of that time has been dedicated to photographing cats exclusively. With his set-up he's able to capture wonderful split-second images of cat's most abandoned expressions as they enjoy every cats favourite treat, catnip. Andrew rescues and raises orphan kittens with his partner Hannah Shaw (the internet's famous Kitten Lady), and many of the models were hand-raised by Andrew and Hannah from newborns. Catnip, or Nepeta cataria, grows wild in many parts of the world and is extremely easy to grow at home in most climates. It's part of the mint family and contained within the bulbs, stems, and leaves is an oil called nepetalactone. Once eaten, rolled on, or crushed, the oil binds to the cat's nasal receptors and stimulates a response that affects a number of areas in the brain, including the hypothalamus and amygdala, two regions that are key in regulating emotional and behavioral responses to stimuli. This produces a mild euphoric effect and

typically lasts about ten to twenty minutes. Catnip is non-addictive and harmless and provides a temporary respite from your cat's gruelling workload of napping all day.

Named One of the New York Post's Best New Books to Read FIRE IN THE STRAW is the witty and deeply felt memoir of Nick Lyons, a man with an intrepid desire to reinvent himself—which he does, over and over. Nick Lyons shape shifts from reluctant student and graduate of the Wharton School, to English Professor, to husband of a fiercely committed painter, to ghost writer, to famous fly fisherman and award-winning author, to father and then grandfather, to Executive Editor at a large book publishing company, and finally to founder and publisher of his own successful independent press.. Written with the same warm and earthy voice that has enthralled tens of thousands of fly-fishing readers, Nick weaves the disparate chapters of his life: from the moment his widowed mother drops him off at a grim boarding school at the age of five, where he spends three lonely and confusing years; to his love of basketball and pride playing for Penn; to the tumultuous period, in the army and after, when he found and was transformed by literature; to his marriage to Mari, his great love and anchor of his life. Suddenly, with a PhD in hand and four children, Nick embarks on a complex and thrilling ride, juggling family, fishing, teaching, writing, and publishing, the wolf always at his door. Against all odds, The Lyons Press survives, his children prosper, his wife's art flourishes, and his books and articles make him a household name. Fire in the Straw is a love story, a confessional, and a beautiful big-hearted memoir.
