*The Case for Proto-Mark* BRILL

This dictionary offers a complete compilation and a historical-comparative reflection of the hereditary lexis of the Kartvelian (South Caucasian) language family. The dictionary contains a wealth of new lexical entries, corrections of earlier attempts and new reconstructions.

*A Fast Platform for Interactive E-Learning Systems* BRILL

This volume presents contributions of the Catholic-Lutheran International Conference held at the Pontifical Athenaeum of St. Anselm in Rome in 2016. The scholars were invited to reflect together on the questions of forgiveness, conversion and penance in the context of the ecumenical dialogue that has been going on since the Second Vatican Council. Precisely because stemming from a deep rethinking of God's forgiveness, the

movement that began half a millennium ago has borne diverse fruits in different traditions. Today, within the context of fraternal dialogue we may be able to recognize in a new way «the signs of God's mercy». This motivation allows us to discover, in this book, new itineraries and processes of the conversion to God which also leads to the rediscovery and the inauguration of authentic forms of penance, both ecclesial and personal.

**Transactions on Rough Sets XVII** Mohr Siebeck

This book deals with the prevention of potential non-evident risks on human health associated with technology which encloses the general knowledge of developing processes used to achieve either goods or services. The voids in technological knowledge used in the development of new technologies are responsible for hidden defects in the same. The authors suggest that hidden defects in technologies are accountable for hazards in generations of environmental factors that they call

technopathogens. These factors can cause adverse effects to human health which are expressed not immediately but over years or even generations. This phenomenon is defined as technopathogeny. Since technopathogeny cannot be framed within existing disciplines related to the phenomenon such as risk assessment, risk management, technology assessment, technological genesis, environmental impact assessment, life cycle assessment or ecology, the authors coin a new term for this specific discipline called Technopathogenology.

**The Crucified Apostle** BRILL

Modern e-learning systems represent a special type of web information systems. Information systems serve multiple users simultaneously. A large number of simultaneous users can slow the information system. Slow interaction with such system is an undesirable problem which can be solved using an appropriate method. One such commonly used method is the continuous upgrade of the underlying hardware. This work deals with

the implementation of a web e-learning system with a different software architecture. In order to implement a web e-learning system with all needed features, a Rich Internet Application framework (RIA) was used. In combination with a special network application, the system is able to provide a better performance than conventional web information systems only with minimal hardware requirements.

#### Haunted Narratives BRILL

For more than 60 years, Jim Lambek has been a profoundly inspirational mathematician, with groundbreaking contributions to algebra, category theory, linguistics, theoretical physics, logic and proof theory. This Festschrift was put together on the occasion of his 90th birthday. The papers in it give a good picture of the multiple research areas where the impact of Jim Lambek's work can be felt. The volume includes contributions by prominent researchers and by their students, showing how Jim Lambek's ideas keep inspiring upcoming generations of scholars.

#### **Biblical Ethics and Application** Narr

Francke Attempto Verlag

Absolute Beginners is a multi-approach study of the founding role of the Absolute as the very beginning of knowledge in medieval philosophy (Henry of Ghent, Richard Conington), the subject being addressed from historical, methodological, and systematic perspectives.

#### *Kartwelisches Etymologisches Wörterbuch* Rudolf Steiner Press

Hauptbeschreibung On 9 November 1989, the Berlin Wall was opened, signalling the beginning of the end of the communist regimes in Central and Eastern Europe. By 1990, free elections had been held in most countries in the region. Forty - in some cases fifty - years of communism had come to an end. However, the 'revolutions' of 1989 were not uniform processes: the starting points were different, the trajectories were different - and outside Central Europe even the outcomes of the transitions from communism were different. The fall of communism also caused the Soviet empire to crumble, and the Soviet Union itself fell apart in December 1991 - as did Czechoslovakia in 1993, and Yugoslavia in a gradual process that was to last from 1991 to 2008. This book originated in a conference held in Oslo 11-13 November 2009, arranged by the E.ON Ruhrgas scholarship programme for political science, and commemorating the 20th anniversary of the 'revolutions' in Central and Eastern Europe. The 16 chapters take stock of developments after 1989, with special emphasis on the causes

and effects of the transitions, including the processes of state unification and separation that followed in the wake of the 'revolutions'. The book is divided into four main parts: regime transitions from communism; state unification and separation; party system continuity and change since 1989 (in Germany, the Czech Republic, Hungary, and Poland); and on the effects of German unification on external and internal German relations. The geographical scope thus varies from chapter to chapter, but the main emphasis is on Germany and its closest Central European neighbours. Elisabeth Bakke is Associate Professor at Department of Political Science, University of Oslo. Ingo Peters is Associate Professor at Department of Political and Social Sciences, Otto Suhr Institute of Political Science, Freie Universität Berlin."

**Harvesting Daniels** Peter Lang GmbH, Internationaler Verlag Der Wissenschaften Up to 1471 the universities of the Roman curia and of Rome (and Avignon as well) were Law Universities of the South-European type. Scholars from all over Europe flocked in to study Law in theory, to gain professional practice at the curia and bring back academic grades.

#### *Technopathogenology* Counterpoints Primers

Peter and Paul have fascinated Christians since the first century. Though often pitted against one another in scholarship and popular imagination, they respected one another. In seventeen essays the contributors probe enduring issues in ways that provide fresh insights. They strive to advance New Testament scholarship by addressing Peter and Paul's historical interaction, their intertextual exegesis, and Paul's view of Pastoral Theology. Their focus on intertextuality reflects Peter's and Paul's saturation in scripture and their focus on Jewish and Gentile relationships seeks to foster unity in church and culture. Contributors: Michael Allen, Christopher A. Beetham, John Dennis, Wesley Hill, Paul R. House, Panagiotis Kantartzis, Alexander N. Kirk, Sean McDonough, Douglas C. Mohrmann, Elizabeth E. Shively, Peter Stuhlmacher, Joel White, William N. Wilder, H. H. Drake Williams III, Joel Willitts, Todd A. Wilson, Jeff Wisdom

#### **Brain Endoscopy in Hydrocephalus**

University of Toronto Press

This volume responds to and reassesses the work of Hector-Neri Castañeda (1924-1991). The essays collected here, written by his students, followers, and opponents, examine Castañeda's seminal views on deontic logic, metaethics, indedicality, praticitions, fictions, and metaphysics, utilizing the critical

viewpoint afforded by time, as well as new data, to offer insights on his theories and methodology.

#### SAP S/4HANA BRILL

This book offers a study of the medieval Georgian translation of Proklos' *Elementatio Theologica*. It establishes its significance for the Greek text and provides first insights into the textual and philosophical significance of Georgian translations and commentaries of Greek texts.

#### *Martini Bucerii opera* John Benjamins Publishing

Why is it that we tend to think about our lives as stories? Why do we strive to create coherent narratives that reflect a particular perspective? What happens when we discover multiple, perhaps conflicting perspectives in our narratives? Following groundbreaking work in the study of narrative identity in the last 20 years, the scholars of this volume have expanded and merged their theories of narrative identity with new perspectives in fields such as narratology, literary theory, philosophy, cultural studies, psychology, sociology, gender studies and history. Their contributions focus on the significance of perspective in the formation of narrative identities, probing the stratagems and narrative means of individuals in testing out personae for themselves.

*Ruhani Satsang* Peter Lang GmbH, Internationaler Verlag Der Wissenschaften This book constitutes the thoroughly refereed post-conference proceedings of the International Dagstuhl-Seminar on Efficient Algorithms for Global Optimization Methods in Computer Vision, held in Dagstuhl Castle, Germany, in November 2011. The 8 revised full papers presented were carefully reviewed and selected by 12 lectures given at the seminar. The seminar focused on the entire algorithmic development pipeline for global optimization problems in computer vision: modelling, mathematical analysis, numerical solvers and parallelization. In particular, the goal of the seminar was to bring together researchers from all four fields to analyze and discuss the connections between the different stages of the algorithmic design pipeline.

#### Castañeda and his Guises Walter de Gruyter GmbH & Co KG

Voluntary death plays a central role in various discourses of the Hebrew Bible, Second Temple Period Judaism, Early Christianity and its pagan environment, Rabbinic Judaism as well as in Islam. The established concepts of martyrdom are challenged. - Das freiwillige Sterben spielt

eine zentrale Rolle in zahlreichen Diskursen der Hebräischen Bibel, im Judentum des Zweiten Tempels, im frühen Christentum und seiner paganen Umwelt, im rabbinischen Judentum und im Islam. Ein verallgemeinernder Martyriumsbegriff wird der Komplexität dieses Phänomens nicht gerecht.

Rethinking Narrative Identity Springer  
The Rose Cross meditation is central to the western - Rosicrucian - path of personal development as presented by Rudolf Steiner. Steiner repeatedly referred to the meditation as a 'symbol of human development' that illustrates the transformation of the human being's instincts and desires. These work unconsciously in the soul, and in thought, feeling and will. Through personal development, the 'I' - the essential self - can gain mastery over these unconscious forces of the soul. The Rose Cross meditation features the red rose as an image to which the student, via specific means, aspires. To the plant is added the black cross which, pointing to the mystery of death and resurrection, provides a symbol of the higher development of the human I. The metamorphosis of the roses and the cross into the symbol of the Rose Cross is brought about by the student's inner efforts, creating an entirely new image. This becomes the starting point for further steps along the meditative path. The Rose Cross meditation is the only pictorial meditation whose content and structure Steiner described in such detail. In this invaluable book, the editor has drawn together virtually all Rudolf Steiner's statements on the subject, arranging them chronologically within the motif of each chapter. His words are supported by commentary and notes.

Absolute Beginners Routledge  
Archaeologists and the public at large have long been fascinated by monumental architecture built by past societies. Whether considering the earthworks in the Ohio Valley or the grandest pyramids in Egypt and Mexico, people have been curious as to how pre-modern societies with limited technology were capable of constructing monuments of such outstanding scale and quality. Architectural energetics is a methodology within archaeology that generates estimates of the amount of labor and time allocated to construct these past monuments. This methodology allows for detailed analyses of architecture and especially the analysis of the social power underlying such projects. Architectural

Energetics in Archaeology assembles an international array of scholars who have analyzed architecture from archaeological and historic societies using architectural energetics. It is the first such volume of its kind. In addition to applying architectural energetics to a global range of architectural works, it outlines in detail the estimates of costs that can be used in future architectural analyses. This volume will serve archaeology and classics researchers, and lecturers teaching undergraduate and graduate courses related to social power and architecture. It also will interest architects examining past construction and engineering projects. Efficient Algorithms for Global Optimization Methods in Computer Vision BRILL

The authors of this volume discuss the relevance and influence of various Old and New Testament documents, and early Christian and Jewish texts in terms of their impact in shaping the moral character, identity, and behaviour of the specific communities in which they were produced as well as their ethical application throughout the centuries. Against a narrow understanding of ethics, the term "application" is not used to analyse the texts of the Bible as step-by-step manuals for moral conduct. Rather, the contributors engage with biblical texts within the framework of a complex hermeneutical process of application of the relevance of these texts in contemporary ethical discourse. Contributors: Paul N. Anderson, Robert L. Brawley, Cilliers Breytenbach, Ulrich Busse, R. Alan Culpepper, Jan Willem van Henten, Rainer Hirsch-Luipold, Stephan Joubert, Craig R. Koester, Bart J. Koet, Michael Labahn, Tobias Nicklas, Bert Jan Lietaert Peerbolte, Udo Schnelle, Michael Theobald, D. Francois Tolmie, Joseph Verheyden, Ben Witherington, III, Ellen van Wolde, Michael Wolter, Mirjam Zimmermann, Ruben Zimmermann  
**Martyriumsvorstellungen in Antike und Mittelalter** Rajneesh Foundation International

"Serves as an introduction to the life and work of the Russian psychologist Lev Vygotsky. This book examines Vygotsky's emphasis on the role of cultural and historical context in learning, while challenging theories that emphasize a universalistic view of learning through fixed, biologically determined stages of development." --WorldCat.

Controlling the Silver Springer  
This book constitutes the refereed proceedings of the 5th IFIP WG 5.5/SOCOLNET Doctoral Conference on

Computing, Electrical and Industrial Systems, DoCEIS 2014, held in Costa de Caparica, Portugal, in April 2014. The 68 revised full papers were carefully reviewed and selected from numerous submissions. They cover a wide spectrum of topics ranging from collaborative enterprise networks to microelectronics. The papers are organized in the following topical sections: collaborative networks; computational systems; self-organizing manufacturing systems; monitoring and supervision systems; advances in manufacturing; human-computer interfaces; robotics and mechatronics, Petri nets; multi-energy systems; monitoring and control in energy; modelling and simulation in energy; optimization issues in energy; operation issues in energy; power conversion; telecommunications; electronics: design; electronics: RF applications; and electronics: devices.

**Die Übersetzungen Der Elementatio Theologica Des Proklos und Ihre Bedeutung Für Den Proklostext** Peter Lang GmbH, Internationaler Verlag Der Wissenschaften

Exploring life writing from a variety of cultural contexts, Haunted Narratives provides new insights into how individuals and communities across time and space deal with traumatic experiences and haunting memories. From the perspectives of trauma theory, memory studies, gender studies, literary studies, philosophy, and post-colonial studies, the volume stresses the lingering, haunting presence of the past in the present. The contributors focus on the psychological, ethical, and representational difficulties involved in narrative negotiations of traumatic memories. Haunted Narratives focuses on life writing in the broadest sense of the term: biographies and autobiographies that deal with traumatic experiences, autobiographically inspired fictions on loss and trauma, and limit-cases that transcend clear-cut distinctions between the factual and the fictional. In discussing texts as diverse as Toni Morrison's *Beloved*, Vikram Seth's *Two Lives*, deportation narratives of Baltic women, Christa Wolf's *Kindheitsmuster*, Joy Kogawa's *Obasan*, and Ene Mihkelson's *Ahasveeruse uni*, the contributors add significantly to current debates on life writing, trauma, and memory; the contested notion of [cultural trauma]; and the transferability of clinical-psychological notions to the study of literature and culture.
