Astronomy Education SAGE Publications Limited
 For anyone interested in the history and effects of the introduction of so-called "Modern Mathematics" (or "Mathématique Moderne," or "New Mathematics," etc.) this book, by Dirk De Bock and Geert Vanpaemel, is essential reading. The two authors are experienced and highly qualified Belgian scholars and the book looks carefully at events relating to school mathematics for the period from the end of World War II to 2010. Initially the book

focuses on events which helped to define the modern mathematics revolution in Belgium before and during the 1960s. The book does much more than that, however, for it traces the influence of these events on national and international debates during the early phases of the reform. By providing readers with translations into English of relevant sections of key Continental documents outlining the major ideas of leading Continental scholars who contributed to the "Mathématique Moderne" movement, this book makes available to a wide readership, the theoretical, social, and political backdrops of Continental new mathematics reforms. In particular, the book focuses on the contributions made by Belgians such as Paul Libois, Willy Servais, Frédérique Lenger, and Georges Papy. The influence of modern mathematics fell away rapidly

in the 1970s, however, and the authors trace the rise and fall, from that time into the 21st century, of a number of other approaches to school mathematics—in Belgium, in other Western European nations, and in North America. In summary, this is an outstanding, landmark publication displaying the fruits of deep scholarship and careful research based on extensive analyses of primary sources.

Learners & Pedagogy Purple Room Publishing

Have some monstrous fun going back to school! Celebrate the first day of school with hilarious, energetic monsters in *Monsters Love School* by author-illustrator Mike Austin. Summer is over, and now it's time for the biggest adventure of all...*Monster School!* Join these colorful monsters as they go to school for the first time. Reading and writing and learning your monster history has never been so much fun! Fans of *Monsters Love Colors* and others will love this exciting picture book.

Water for People, Water for Life

HarperCollins

This textbook looks at the relationship between views of learning, learners, knowledge and pedagogy. Worldwide, education is being subjected to a succession of policy initiatives and political interventions. Questions of what should be taught, and how, are subjects of constant debate, seldom based on research findings or theoretical principles. The articles in this volume have been chosen to show how theories can provide frameworks for analysing pedagogy and to create a dialogue about new possibilities for advancing practice. *Learners and Pedagogy* is a Course Reader for The Open University course E836 Learning Curriculum and Assessment.

Radio Amateur Callbook 1997 Peter Lang Pub Incorporated

It focuses particularly on the daily practice of teaching, where ambiguities and discrimination are rarely perceived and seldom analysed by those involved.

How to Hold a Crocodile Springer

This eagerly awaited CD-ROM offers over 1.3 million amateur radio and shortwave users unmatched access to fellow listeners through quick and easy browsing.

Features include Windows/DOS platform; data display by call sign, name, city, license class; sound output in Morse code for blind and other users; club listings; QSL managers; and much more.

The Abel Prize Penguin

Explains how to do practical and improbable things, such as how to roast an ox, handle a hamster, photograph a fish, play the bagpipes, and vanquish a

vampire.].

The European Language Teacher Jessica Kingsley Publishers

Follow the line from the science corner to the library, from recess to show-and-tell. This new *Follow the Line* book—illustrated in Laura Ljungkvist's signature line style—takes children on a colorful, comforting, and altogether fun romp through the school day. With its unique modern design and engaging interactive text, *Follow the Line to School* is sure to appeal to both new and returning students.

Phylogenetic Diversity WHOROEM

Health researchers, the intended audience of this book, are not limited to scientists pursuing a research career. They include health professionals, administrators, policymakers and non-governmental organizations, among others, who can and should use the scientific method to guide their work for improving the health of individuals and communities. Even if they do not pursue much research themselves, they need to grasp the principles of the scientific method, to understand the value and also the limitations of science, and to be able to assess and evaluate results of research before applying them. This book includes the following chapters:

Introduction and overview; ethics in health research; what research to do; planning the research; writing the research protocol; submitting a research proposal; implementing the research project; describing and analysing the research results; communicating research; guidelines on writing a scientific paper; publishing a scientific paper; guidelines on making a scientific presentation; assessing and evaluating research.

Teaching English Worldwide Springer Nature

Un workbook qui fait la différence. Pour progresser quel que soit son niveau : des rubriques pour réfléchir à sa façon de travailler ; des activités de différents niveaux pour un même document. Pour renforcer son autonomie : une exploitation pas à pas des documents du manuel ; la possibilité d'annoter les textes pour mieux se les approprier. Pour travailler grammaire et lexique : des rubriques d'observation de la langue pour chaque leçon ; de nombreux exercices d'entraînement lexical et grammatical ; une page Prononciation par unité. Pour apprendre à s'auto-évaluer : des grilles d'auto-évaluation à compléter pour chaque mini challenge ; des activités de préparation à l'évaluation pour toutes les activités langagières.

Teaching and Learning Mathematics

New Brunswick, N.J : Rutgers University Press

This textbook includes all 13 chapters of *Français interactif*. It accompanies www.laits.utexas.edu/fi, the web-based French program developed and in use at the University of Texas since 2004, and its companion site, *Tex's French Grammar* (2000) www.laits.utexas.edu/tex/ *Français interactif* is an open access site, a free and open multimedia resources, which requires neither password nor fees. *Français interactif* has been funded and created by Liberal Arts Instructional Technology Services at the University of Texas, and is currently supported by COERLL, the Center for Open Educational Resources and Language Learning UT-Austin, and the U.S. Department of Education Fund for the Improvement of Post-Secondary Education (FIPSE Grant P116B070251) as an example of the open access initiative.

Challenges in Basic Mathematics Education Springer

Astronomy is a popular subject for non-science majors in the United States, often representing a last formal exposure to science. Research has demonstrated the efficacy of active learning, but college astronomy instructors are often unaware of the tools and methods they can use to increase student comprehension and engagement. This book focuses on practical implementation of evidence-based strategies that are supported by research literature. Chapter topics include an overview of learner-centered theories and strategies for course design and implementation, the use of Lecture-Tutorials, the use of technology and simulations to support learner-centered teaching, the use of research-based projects, citizen science, World Wide Telescope and planetariums in instruction, an overview of assessment, considerations for teaching at a community college, and strategies to increase the inclusivity of courses.

Second Language Learning Through Cooperative Learning Springer

The book presents the winners of the first five Abel Prizes in mathematics: 2003 Jean-Pierre Serre; 2004 Sir Michael Atiyah and Isadore Singer; 2005 Peter D. Lax; 2006 Lennart Carleson; and 2007 S.R. Srinivasa Varadhan. Each laureate provides an autobiography or an interview, a curriculum vitae, and a complete bibliography. This is complemented by a scholarly description of their work written by leading experts in the field and by a brief history of the Abel Prize. Interviews with the laureates can be found at <http://extras.springer.com>.

Rods, Sets and Arrows Springer Science & Business Media

Teach English worldwide with this practical introduction to the field. Specially designed for those thinking about teaching English, planning to take a TESOL training course, or just starting work in a language school, this user-friendly resource adds a bundle of enjoyment to the process. The 21 chapters cover all the essentials, including answers to basic questions about language teaching; how to manage your classroom, plan lessons, and use textbooks ; methods and ideas for teaching listening, speaking, reading, and writing; understanding of basic grammar verb forms; a wealth of knowledge and activities for using visual aids, games, drama, and songs; awareness of pronunciation and the International Phonetic Alphabet; suggestions on correcting errors and testing; and a reference section featuring a first lesson plan and a placement test. Each unit features tasks for the reader and wraps up with review questions and a Further Reading list. This is a basic "must" to pack in your suitcase as you prepare to teach.

The Armpit of Doom UNESCO
Ladybird is a lazy little insect. She's just too lazy to fly! But when she catches a lift on some passing animals, she's in for a BIG surprise! My First Storybooks are perfect for reading aloud and sharing with your special little one. With simple, easy-

to-follow stories, these shiny, padded-cover books introduce fun vocabulary with bright engaging pictures throughout.

Readings in the Economics of Education Springer Science & Business Media

Grenfell, Kelly, and Jones (all U. of Southampton, UK) examine the current situation of initial and in-service training of secondary and primary school teachers of foreign as distinct from second languages in Europe. Based on a study commissioned by the EU Commission, Directorate General for Education and Culture, the policy-oriented text outlines

Water Berghahn Books

"Biodiversity" refers to the variety of life. It is now agreed that there is a "biodiversity crisis", corresponding to extinction rates of species that may be 1000 times what is thought to be "normal". Biodiversity science has a higher profile than ever, with the new Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services involving more than 120 countries and 1000s of scientists. At the same time, the discipline is re-evaluating its foundations – including its philosophy and even core definitions. The value of biodiversity is being debated. In this context, the tree of life ("phylogeny") is emerging as an important way to look at biodiversity, with relevance cutting across current areas of

concern – from the question of resilience within ecosystems, to conservation priorities for globally threatened species – while capturing the values of biodiversity that have been hard to quantify, including resilience and maintaining options for future generations. This increased appreciation of the importance of conserving "phylogenetic diversity", from microbial communities in the human gut to global threatened species, has inevitably resulted in an explosion of new indices, methods, and case studies. This book recognizes and responds to the timely opportunity for synthesis and sharing experiences in practical applications. The book recognizes that the challenge of finding a synthesis, and building shared concepts and a shared toolbox, requires both an appreciation of the past and a look into the future. Thus, the book is organized as a flow from history, concepts and philosophy, through to methods and tools, and followed by selected case studies. A positive vision and plan of action emerges from these chapters, that includes coping with inevitable uncertainties, effectively communicating the importance of this "evolutionary heritage" to the public and to policy-makers, and ultimately contributing to biodiversity conservation policy from local to global scales.
