Wild-flower Sonnets Collins

Over the course of ten days, the lives of thirteen-year-old Alex Macintyre and his twin sister Donna will change forever... Alex and Donna live in the seaside town of Holcombe Bay with their

father, a reclusive inventor, and their grandmother, a school dinner lady. When the twins set up Eye Spy Investigations in an attempt to earn some money, they become involved in the case of Kiki, a missing lap dog. On the trail of a potential dog-napping gang, they are soon investigating three suspects: a bag lady; a mysterious man in a fur hat; and the bikers who hang out at the Starship Café. But as they pursue their suspects, Alex begins to realise that there is a mystery in his own family involving the mother they never knew. When the twins attempt to help their father market his latest invention, a robot, things go horribly wrong, and they uncover a devastating family secret. As events spiral out of control, can Alex find out the truth about their

mother, save Donna from imminent danger, and return Kiki to her rightful owner? Aimed at 9-to-12-year olds, Eye Spy is more than just a straightforward mystery story; it is also a tale of family secrets and lies – and what happens when these are revealed.

Wild flowers are a great passion for Carol, and for the TV show this year she's travelling the length and breadth of the country to find the most exquisite flora occurring naturally in our woodlands, hedgerows, meadows and moors, and then she sets off in search of their cultivated cousins, and shows us how to grow them in our own gardens. In her accompanying book, Carol delves into the story of each plant, full of myth, legend and country lore, and as always shares her practical expertise, passing on hints and tips, including which variations to go for, how and where to plant, and what with, for the most spectacular results. Containing thirty two of Britain's favourite wild flowers and their home-grown descendents, structured by season and illustrated with Jonathan Buckley's amazing photographs, this book of botanical wonders will inspire, surprise and inform gardeners of all levels.

Oklahoma Territory 1876. The wild child of a Cherokee mother and white father, Taylor Christie James escapes from prison hours before hanging for a murder she didn't commit. Now a wanted criminal in the Cherokee nation, she heeds her mother's desperate plea to go to St. Louis--to her father--and learn the truth about her past. Proud and defiant in buckskins and a holster, Taylor rides her painted warhorse to the doorsteps of her father's elegant mansion. Here she is confronted by Grey Talbott, a man who knows that this beautiful half-breed daughter of one of St. Louis' most prominent citizens has unwittingly brought danger to them all. Secrets have conspired to shape Taylor's life, secrets born of unrequited love, scandal, dark mystery, and murder. As she surrenders to the passion Grey awakens in her turbulent heart, she must face the danger closing in. For only then will she find the gift of healing, if she dares to risk all for her family, her heritage, and the man she loves.

Early Spanish explorers in the late eighteenth century found springtime California covered with spectacular carpets of wildflowers from San Francisco to San Diego. Yet today, invading plant species have devastated this nearly forgotten botanical heritage. In this lively, vividly detailed work, Richard A. Minnich

synthesizes a unique and wide-ranging array of sources—from the historic accounts of those early explorers to the writings of early American botanists in the nineteenth century, newspaper accounts in the twentieth century, and modern ecological theory—to give the most comprehensive historical analysis available of the dramatic transformation of California's wildflower prairies. At the same time, his groundbreaking book challenges much current thinking on the subject, critically evaluating the hypothesis that perennial bunchgrasses were once a dominant feature of California's landscape and instead arguing that wildflowers filled this role. As he examines the changes in the state's landscape over the past three centuries, Minnich brings new perspectives to topics including restoration ecology, conservation, and fire management in a book that will change our view of native California.

The I-spy Guide to Wild Flowers Michelin Travel Publications
An enchanting and captivating novel about how our untold stories haunt us — and the stories we tell ourselves in order to survive. After her family suffers a tragedy, nine-year-old Alice Hart is

forced to leave her idyllic seaside home. She is taken in by her grandmother, June, a flower farmer who raises Alice on the language of Australian native flowers, a way to say the things that are too hard to speak. Under the watchful eye of June and the women who run the farm, Alice settles, but grows up increasingly frustrated by how little she knows of her family's story. In her early twenties, Alice's life is thrown into upheaval again when she suffers devastating betrayal and loss. Desperate to outrun grief, Alice flees to the dramatically beautiful central Australian desert. In this otherworldly landscape Alice thinks she has found solace, until she meets a charismatic and ultimately dangerous man. Spanning two decades, set between sugar cane fields by the sea, a native Australian flower farm, and a celestial crater in the central desert, *The Lost Flowers of Alice Hart* follows Alice's unforgettable journey, as she learns that the most powerful story she will ever possess is her own.

Much as we all love Hay-on-Wye's bookshops, what was life like in Hay before they arrived? Bridget Ashton, a well-respected local historian, lived here as a child. In this compelling account, she sets out to recall, from the perspective of her girlhood self, what Hay was like in the 1940s and '50s - with trains, a half-ruined castle, and a cinema (we all know what happened to that). 'The Beeman's family' lived in Market Street, off Castle Square. How did they come to be here? What was family life like in those frugal times? This is the framework for a profound evocation of rural childhood in the post-war years.
