Among the Wicked In Farbe und Bunt Verlag
 In America in 2003, Funny Cide became the people's horse', the unheralded New York-bred gelding who inspired a nation by knocking off the champions and their multi-millionaire owners and sweeping to the brink of the Triple Crown. Trained by a journeyman who had been knocking around racing for more than thirty years, ridden by a hard-luck jockey, and owned by a tiny stable founded by a band of high school buddies who tossed in a few thousand dollars each and decided to follow their dream, Funny Cide became a blue-collar hero with a bit. His story is crammed with colourful characters only one of which happened to be a horse. Written with Sally Jenkins, co-author of Lance Armstrong's number-one bestseller *It's Not About the Bike*, Funny Cide tells the whole story the parts we know and the parts we never suspected as it follows the group's emotional ups and downs against overwhelming odds, illness and even scandal, to capture the imagination of millions. It is a book for the underdog in all of us.

 'You turn the pages as if your very life depends on it' - Daily Mail
 Mr Marseille is polite, elegant, and erudite. He would do anything for his genteel true love Anabelle. And he is a psychopath. A quiet Philadelphia suburb. A woman cycles past a train depot with her young daughter. And there she finds a murdered girl posed on a newly painted bench. Strangled. Beside her is a formal invite to a

tea dance in a week's time. Seven days later, two more young victims are discovered in a disused house, posed on painted swings. At the scene is an identical invite. This time, though, there is something extra waiting for Detectives Kevin Byrne and Jessica Balzano. A delicate porcelain doll. It's a message. And a threat. With Marseille and Anabelle stalking the city, Detectives Byrne and Balzano have just seven days to find the link between the murders before another innocent child is snatched from its streets.  This study will significantly further our interpretations of the unique autobiography of Margery Kempe, lay woman turned mystic and visionary. Following the manuscript from a Carthusian monastery through history, Chappell bridges the gaps in our understanding of the transmission of texts from the medieval past to the present.

Corona Magazine 08/2017: August 2017 In Farbe und Bunt Verlag In horse racing greatness is defined by speed. Being the second fastest counts for little. You have to win. And win. And keep winning until every challenger of your generation is put to the sword. Of the twelve horses lined up on Newmarket Heath that 2011 day, one would do just that. And more. To become the greatest racehorse that has ever lived.

Revised and enlarged translation from the Hungarian.

From Jupiter to Christ Hachette UK

I must have been CURSED from birth.....and that is becoming clearer with every passing day.My ankles are swollen from the chains around them, my tongue feels like sandpaper, and the dripping water in the jail cell beside mine is so close, yet so far away.For the first time in werewolf history, two wolves have the same mate. The same woman was blessed by their goddess to be their partner for eternity, and I'm that woman.Yeah, that's not a blessing to me... It's bad enough I'm a human and unworthy of being a wolf's mate, but now I'm the mate to two rival wolves, two alphas-to-be.Xavier and I have grown close.....but Axel Grimmwolf, eye candy and a man no one dares stand against, is

disgusted by the thought of a human being as his mate. But even so, he lacks the strength to reject me...So here I am, chained up in his dungeon, with no idea what Axel will do with me after he uses me to get rid of Xavier's pack. Assuming I live that long... I know Xavier is searching for me, but what if he doesn't find me in time?What if this is how I'm meant to die?

The first part of this cumulative dissertation is divided into two chapters. The second chapter provides the relevant theoretical background.

Corona Magazine 02/2017: Februar 2017 HarperCollins UK The fully updated autobiography of Tony 'A.P.' McCoy, Grand National and BBC SPORTS PERSONALITY OF THE YEAR winner and unquestionably the greatest jump jockey ever. Tony 'A.P.' McCoy is without doubt the greatest and most successful jump jockey of all time. He has collected a record 16 consecutive jump-jockey titles to date, since 1992 he has ridden more than 3,000 winners, saying 'I never stop dreaming of the day I'll reach 4,000', and in 2002 he beat Sir Gordon Richards's record of 269 winners in a season by riding 289. In April 2010, A.P. achieved his lifelong ambition when he won the Grand National at Aintree on Don't Push It. It was his 15th attempt to win the race, a victory that captured the public's imagination and further enhanced a glittering career in which he had seemingly won all there was to win. It was the missing piece in the racing jigsaw for a champion jockey who had already had famous victories in the King George VI Chase, Champion Hurdle, Champion Chase and Cheltenham Gold Cup. This powerfully honest autobiography looks at life at the very top in National Hunt racing, and includes the highs and lows of A.P. winning his second Gold Cup, in 2012 on Synchronised, fifteen years after his first, only to see the horse put down after a fall in that year's Grand National. These are the memoirs of a true champion, an icon of sport, whose astonishing achievements are unlikely to be surpassed. It is a great story of courage and modesty, pain and professional setbacks, strong family values and sporting triumphs, the good guy coming first - and staying there.

Emerging from a decade of research, 'From Jupiter to Christ' demonstrates that the decisive change within the Roman imperial period was not a growing number of religions or changes in their ranking and success, but a modification of the idea of 'religion' and a change in the social place of religious practices and beliefs.

In his master thesis, Sven Painer develops, implements, and evaluates a method to reconstruct the liver surface from monocular mini-laparoscopic sequences. The principal focus of his research is to create a basis for helping clinicians to write reports with quantitative descriptions of the liver surface. A Structure from Motion approach is performed to do a sparse reconstruction of the liver surface and subsequently this information is used in a variation based dense 3D reconstruction. The algorithms are formulated in a causal way, enabling the implementation to be run in real-time on an adequate hardware platform. The results show a significant performance increase and pave the way to give clinicians a feedback during video capturing to improve the quality of the reconstruction in the near future.
