SIENA O'DONNELL

A Final Course Of Grammer & Composition Routledge
In the early twentieth century, public health reformers approached the task of ameliorating unsanitary conditions and preventing epidemic diseases with optimism. Using exhibits, they believed they could make systemic issues visual to masses of people. Embedded within these visual displays were messages about individual action. In some cases, this meant changing hygienic practices. In other situations, this meant taking up action to inform public policy. Reformers and officials hoped that

exhibits would energize America's populace to invest in protecting the public's health. Exhibiting Health is an analysis of the logic of the production and the consumption of this technique for popular public health education between 1900 and 1930. It examines the power and limits of using visual displays to support public health initiatives.

With an interdisciplinary approach that encompasses political history, the history of ideas, cultural history and art history, *The Victorian World* offers a sweeping survey of the world in the nineteenth century. This volume offers a fresh evaluation of Britain and its global presence in the years from the 1830s to the 1900s. It brings together scholars from history, literary studies, art history, historical geography, historical sociology, criminology, economics and the history of law, to explore more than 40 themes central to an understanding of the nature of Victorian society and culture, both in Britain and in the rest of the world. Organised around six core themes - the world order, economy and society, politics, knowledge and belief, and culture - *The Victorian World* offers thematic essays that consider the interplay of domestic and global dynamics in the formation of Victorian

orthodoxies. A further section on 'Varieties of Victorianism' offers considerations of the production and reproduction of external versions of Victorian culture, in India, Africa, the United States, the settler colonies and Latin America. These thematic essays are supplemented by a substantial introductory essay, which offers a challenging alternative to traditional interpretations of the chronology and periodisation of the Victorian years. Lavishly illustrated, vivid and accessible, this volume is invaluable reading for all students and scholars of the nineteenth century.
