Saunders Company

Radiofrequency (RF) has been used in many areas of medicine for some time, but only gained popularity in aesthetics in the early 2000s. Although initial procedures provided variable results, the field of RF has grown dramatically. Currently, a multitude of devices which offer an array of technologies, each geared to specific applications, are on the market. In this book, a comprehensive discussion of the evolving area of RF is provided, and the current and cutting-edge technologies which span from noninvasive treatments of facial wrinkles to invasive body contouring procedures are discussed in detail. The methodologies covered include thermal and ablative modalities, volumetric and fractional approaches, as well as practical aspects of application in

clinical practice. Included are also pearls on patient management and prevention and treatment of complications. Finally, RF-based procedures are compared with equivalent laser and surgical approaches in a risk-benefit evaluation. Reviewing the standard of care for RF-based treatments and providing information relevant for clinical decision-making and practice management, this publication is a valuable tool for dermatologists, plastic surgeons and all practitioners who use or are contemplating the introduction of RF into practice.

The series "Clinical Approaches and Procedures in Cosmetic Dermatology" intends to be a practical guide in Cosmetic Dermatology. Procedures in cosmetic dermatology are very popular and useful in medicine, indicated to complement topical and oral treatments not only for photodamaged skin but also for other dermatosis such as acne, rosacea, scars, etc. Also, full-face treatments using peelings, lasers, fillers and toxins are increasingly being used, successfully substituting or postponing the need for plastic surgeries.

Altogether, these techniques not only provide immediate results but also help patients to sustain long-term benefits, both preventing/treating dermatological diseases and maintaining a healthy and youthful skin. Throughout this series, different treatments in Cosmetic Dermatology will be discussed in detail covering the use of many pharmacological groups of cosmeceuticals, the new advances in nutraceuticals and emerging technologies and procedures. This volume, entitled "Daily Routine in Cosmetic Dermatology" will be an important tool for aesthetic doctors, practicing dermatologists, plastic

surgeons, and all other physicians interested in the field of aesthetic medicine. It discloses in detail the semiology and general treatments in cosmetic dermatology, providing the state-of-the-art regarding patients' evaluation, photoprotection, nutraceuticals and cosmeceuticals and special prescriptions. This book is a resource that offers guidance to nurses who are experienced or novice aesthetic practitioners and would like to improve their aesthetic practice and enhance patient safety and

satisfaction. This textbook reviews skin structure and anatomy, what happens as facial structures age, the effects of aging coupled with environmental exposures, pharmacology of medications used in aesthetics, light-based device properties, patient selection, and benefits of treatments. In addition, it includes suggestions on how to communicate with patients to achieve successful outcomes. **Aesthetic Procedures: Nurse Practitioner's Guide to Cosmetic Dermatology** provides practitioners a one-source resource to attain more in-depth learning about cosmetic dermatology. Although there are several texts on individual aspects of aesthetic medicine, there is no all-inclusive book for nurses. This book affords the primary care practitioner the opportunity to add minimally invasive cosmetic dermatology procedures to their practice and perform the treatments safely, efficiently and effectively while avoiding common mistakes and minimizing complication risks. Education is paramount in creating a safe patient environment and as more clinicians turn to aesthetics to augment their practice, this book will be a valuable resource for nurses and practitioners all over the world.
