A rich, multifaceted history of affirmative action from the Civil Rights Act of 1866 through today's tumultuous times From acclaimed legal historian, author of a biography of Louis Brandeis ("Remarkable" —Anthony Lewis, *The New York Review of Books*, "Definitive"—Jeffrey Rosen, *The New Republic*) and *Dissent and the Supreme Court* ("Riveting"—Dahlia Lithwick, *The New York Times Book Review*), a history of affirmative action from its beginning with the Civil Rights Act of 1866 to the first use of the term in 1935 with the enactment of the National Labor Relations Act (the Wagner Act) to 1961 and John F. Kennedy's Executive Order 10925, mandating that federal contractors take "affirmative action" to ensure that there be no discrimination by "race, creed, color, or national origin" down to today's American society. Melvin Urofsky explores affirmative action in relation to sex, gender, and education and shows that nearly every public university in the country has at one time or another instituted some form of affirmative action plan--some successful, others not. Urofsky traces the evolution of affirmative action through labor and the struggle for racial equality, writing of World War I and the exodus that began when some six million African Americans moved northward between 1910 and 1960, one of the greatest internal migrations in the country's history. He describes how Harry Truman, after becoming president in 1945, fought for Roosevelt's Fair

Employment Practice Act and, surprising everyone, appointed a distinguished panel to serve as the President's Commission on Civil Rights, as well as appointing the first black judge on a federal appeals court in 1948 and, by executive order later that year, ordering full racial integration in the armed forces. In this important, ambitious, far-reaching book, Urofsky writes about the affirmative action cases decided by the Supreme Court: cases that either upheld or struck down particular plans that affected both governmental and private entities. We come to fully understand the societal impact of affirmative action: how and why it has helped, and inflamed, people of all walks of life; how it has evolved; and how, and why, it is still needed.

NATIONAL BESTSELLER • "One of contemporary literature's most revered essayists revives her raw records from a 1970s road trip across the American southwest ... her acute observations of the country's culture and history feel particularly resonant today." —Harper's Bazaar
Joan Didion, the bestselling, award-winning author of *The Year of Magical Thinking* and *Let Me Tell You What I Mean*, has always kept notebooks—of overheard dialogue, interviews, drafts of essays, copies of articles. Here are two extended excerpts from notebooks she kept in the 1970s; read together, they form a piercing view of the American political and cultural landscape. "Notes on the South" traces a road trip that she and her husband, John Gregory Dunne, took through Louisiana, Mississippi, and Alabama. Her acute observations about the small towns they pass through, her interviews with local figures, and their preoccupation with race, class, and heritage suggest a South largely unchanged today. "California Notes" began as an assignment from *Rolling Stone* on the Patty Hearst trial. Though Didion never wrote the piece, the time she spent watching the trial in San Francisco triggered thoughts about the West and her own upbringing in Sacramento. Here we not only see Didion's signature irony and imagination in play, we're also granted an illuminating glimpse into her mind and process.
