This book will focus on an introduction to business law for entrepreneurs. This book is a great very high level introduction to the law topics that are most important to entrepreneurs, including how to register a company, how to protect my family, patents, term sheets, dealing with investors and much more; the course assumes that the reader has no background in law! Most business books are significantly outdated. There are some incredibly engaging and entertaining video links in the book to YouTube and other sources; edutainment rocks! I tried to visualize the content of this book as much as possible as this is a more impactful and enjoyable way to learn (think Pinterest versus the tiny words in the Economist)! The contents of this book are all based on my work experience at several firms, including Goldman Sachs, the consulting industry at Accenture, a few companies I have started, the hedge fund industry where I worked at Citadel and most recently based on my experience at a prominent San Francisco based venture capital firm. I will also include helpful practical business concepts I learned while I did an MBA at Columbia University and a Bachelor of Commerce degree at McGill University. Think of this book as a "greatest hits" accounting summary from my MBA, undergraduate business degree, work experience in consulting, equities, hedge funds, venture capital and starting my own companies. I have also included two bonus chapters on incredibly important business best practices and recent trends that many people often overlook in

business. As the title of this book suggests, this is a great introduction to business law for entrepreneurs. I have minimized "boring theoretical concepts" in this book in order to keep it as close to reality as possible. I hope you enjoy it! In addition to teaching at 4 universities in the Bay Area, you can find other courses that I teach online at :[www.tiny.cc/chris1](http://www.tiny.cc/chris1) I hope you enjoy this book! I am a firm believer that 'edutainment' works best! Thanks a lot, Chris Haroun : )

Steps in the road map include choice of law, contract formation, unenforceable contracts, breach of contract, and plaintiff's remedies. Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further.
